PostDoc position
at the Regenerative Medicine Technologies Lab,
Faculty of Biomedical Sciences,
Università della Svizzera italiana

Università della Svizzera italiana (USI) is a young and lively university, a hub of opportunity open to the world where students are offered a quality interdisciplinary education in which they can be fully engaged and take center stage, and where our researchers can count on having the space to freely pursue their initiative. Established in 1996, USI is in constant evolution, always taking on new challenges while remaining true to its three guiding principles: quality, openness and responsibility.

The Regenerative Medicine Technologies (RMT) Lab is part of the Laboratories for Translational Research of Ente Ospedaliero Cantonale located in Bellinzona (Switzerland). Strategic research areas of the RMT Lab are: in vitro disease modeling through biofabrication (e.g. age-related diseases, cancer metastases, musculo-skeletal diseases); design of novel technologies for drug screening; personalized medicine applications using human tissue biopsies. To promote the advancement of these research areas, the RMT Lab combines microfluidics and microphysiological systems, 3D (bio)printing and computational simulations.

The RMT Lab invites applications for a fully funded PostDoc position in Biomedical Sciences for conducting research in the project entitled I'M AGEING.

The project
The lab has recently granted funding from the Swiss State Secretariat for Education, Research and Innovation which supported an awarded ERC StG transferred to Switzerland. The 5 years project will deal with the identification of the biological mechanisms driving vascular aging through a combination of microphysiological systems, omic analyses and machine learning-based methods. More into detail, the project involves the biofabrication of 3D microvascular networks, their integration with high-throughput culture systems and their analysis through sequencing techniques and high-content screening. The lab has access to cutting-edge facilities (e.g. bulk and single-cell RNAseq; mass spectrometry; confocal, multi-photon and electron microscopy) which are shared with the Institute for Research in Biomedicine and the Institute of Oncology Research within a dynamic, multidisciplinary and collaborative environment.

The PostDoc Position
The PostDoc candidate will work under the scientific supervision of PD Simone Bersini (https://search.usi.ch/it/persone/af37e00b27d5199e68bb294f19e50006/bersini-simone). The successful candidate will be offered the possibility to work in a dynamic research team and in a multidisciplinary and international scientific environment.

The PostDoc candidate will collaborate to the development of the institute research agenda.
The successful candidate will have shared responsibilities in the design and conduction of research projects in the field of Molecular Biology.

The PostDoc candidate is expected to present papers at scientific conferences and produce publications in high-ranking journals.

Candidates’ profile
Ideal candidates should satisfy the following requirements:
• A PhD in Molecular Biology, or related disciplines.
• High personal interest in application of biological approaches to microphysiological systems.
• Expertise in molecular biology, cell culture (preferred if 3D cultures with hydrogels), omic analyses (e.g. RNAseq), imaging (e.g. confocal microscope and high-content screening systems, preferably with 3D cultures), cloning, standard biological techniques (e.g. qPCR, western blot, elisa, immunofluorescence).
• Excellent command of English, both written and spoken.
• A strong desire for research and publishing at top venues.
• Ability to work independently and to plan and direct own work.
• Ability to work in team and autonomy in scheduling research steps. Interest for teaching and tutoring students and availability to collaborate with colleagues (engage in scientific dialogue, listen and think critically) are required.

General terms
Workplace is RMT Lab, located in Bellinzona, Switzerland. Availability to travel to other parts of Switzerland and abroad (for purposes of collaboration and research) is required.

Starting date is January 1, 2023 (at the earliest). However, the position will be kept open until a suitable candidate has been found.

The Application
Applications should contain: (1) a letter in which the applicants describe their research interests and the motivation to apply, (2) a complete CV, (3) copies of relevant diplomas, certificates as well as the full transcript of records, (4) a complete list of publications with details on the candidate’s contributions, (5) minimum 2 and up to 4 reference letters.

Please send your application in electronic form or requests for further information to Simone Bersini (simone.bersini@eoc.ch).

As an institution that values diversity, USI particularly encourages applications from women and from all individuals from underrepresented groups.
