

The Field Project: a bridge between theoretical and practical knowledge

Invitation for companies and institutions

2022/23

**The Field Project:
a bridge between theoretical
and practical knowledge**

The Università della Svizzera italiana (USI), in Lugano, Switzerland, is offering the opportunity to companies to do a Field Project with second-year students from its seven Masters in the Faculties of Communication Sciences, Economics and Informatics.

The Field Project is a consultancy project for a period of three months conducted by a team of three to six international Master's students, who apply their theoretical knowledge and skills acquired in class to real cases in a professional environment. Students work in teams under the supervision of a USI Professor and in coordination with the Client Organization.

Companies and Institutions may advance a proposal to the University for a Field Project in an area of interest covered in one of the seven Masters involved.

June-July*	August-September*	September-December*

Key Milestones

Kick-off meeting with companies	→ Intermediate Report	→ Final Report (in company presentation)
---------------------------------	-----------------------	--

Costs and contract

No fees are charged by USI for the Field Projects, however the Client Organization is responsible for the costs of travel and accommodation, meetings, and extras as specified in the contract. Università della Svizzera italiana and the Client Organization will discuss terms, content and requirements of the Field project and draw up a formal contract that will include issues regarding confidentiality, intellectual property and out-of-pocket expenses.

How to participate

Proposals for Field Projects can be submitted to the Master's Director or the Career Service, which will put the company in touch with the relevant Master's Director for further discussion and approval.
