## Evaluation Summary (check one)

- Pass:** the student has demonstrated sufficient knowledge of the chosen problem area. The student also demonstrated to be able to conduct research.
- Repeat:** the student has not demonstrated sufficient knowledge of the chosen problem area or a clear ability to conduct research. However, the committee believes the student has potentials to learn and to conduct research. The student is therefore required to submit a new research prospectus, and to undergo a second review. Notice that *a third review is not admissible*. Therefore, *a student may be given a "repeat" only once*.
- Fail:** the student has not demonstrated sufficient knowledge of the chosen problem area or a clear ability to conduct research. The committee believes that the student will not successfully complete a doctoral dissertation.
