
Postdoctoral fellow Start date June/July 2019

The Molecular Oncology group directed by Prof. Alimonti at the IOR - Institute of Oncology Research in Bellinzona, Switzerland (<http://www.ior.usi.ch>) is seeking a Postdoctoral fellow

We are looking for highly motivated researchers with a PhD or equivalent degree. The successful candidate will have the opportunity to work on one of several projects focused on cancer immunotherapy. Applicants with a strong background in basic immunology and cancer immunology are encouraged to apply. Salary is highly competitive.

Specific projects include:

- Basic immunology with a focus on myeloid or B cells
- Cancer Immunotherapy

Candidate requirements

- Ph.D or M.D./Ph.D. (already obtained or soon to be)
- At least one first author publication in a relevant journal
- Highly motivated person with strong interest in research
- Experience using mouse models and/or generation of mouse model is also highly desirable.

The IOR is affiliated to USI - Università della Svizzera italiana and other leading Swiss Universities and Research Centers. The IOR/IRB provide excellent core facilities, highly competitive salary and support structures, including automated microscopy systems, FACS scan and sorting facility, next generation sequence and animal facilities.
