## Post-doctoral position in drug discovery for chemokine driven inflammatory conditions (Dr. Mariagrazia Uguccioni)

---

A Post-doctoral Position, funded by the Innosuisse Programme, is available for two years in the Chemokines in Immunity Research group headed by Dr. Mariagrazia Uguccioni.

### Description

The project aims at developing novel compounds targeting ANCA (Anti Neutrophils Cytoplasmatic Antibodies)-associated vasculitis (AAV), and will involve *in vitro* analysis to study the responses of different types of human cells to compounds able to modulate inflammatory conditions.

### Requirements

Previous experience of *in vitro* analysis of human cells and knowledge of chemokine biology is desirable.

### Applications

Interested candidates should send:

- i) curriculum vitae with publication list,
- ii) motivation letter,
- iii) name and e-mail address of two referees.

in a single pdf document to Dr. Mariagrazia Uguccioni by email:  
mariagrazia.uguccioni@irb.usi.ch

Closing date: **15th February 2021**
