The main reference for Lorenzo Rossi’s part of the course is:

The paper will be made available to the students, with the kind permission of the authors, before the Summer School starts.

The remaining items are optional – of course, we do not require participants to read all of them. The following list is designed to provide further references for those who intend to zoom into a specific topic. For those interested in the topics at hand, we recommend to read the items in each group in the order in which they are presented here.

**Selected references by topic**

**General conceptions of paradoxicality and theories of semantic paradox**

**The inclosure conception of paradoxicality**

**The naive conception of paradoxicality**

The proof-theoretic conception of paradoxicality

The graph-theoretic conception of paradoxicality

The revision-theoretic conception of paradoxicality

The Kripkean conception of paradoxicality

Further references on semantic paradox

Further references on Kripke’s theory
