How to configure wired 802.1X for Mac OS

Introduction

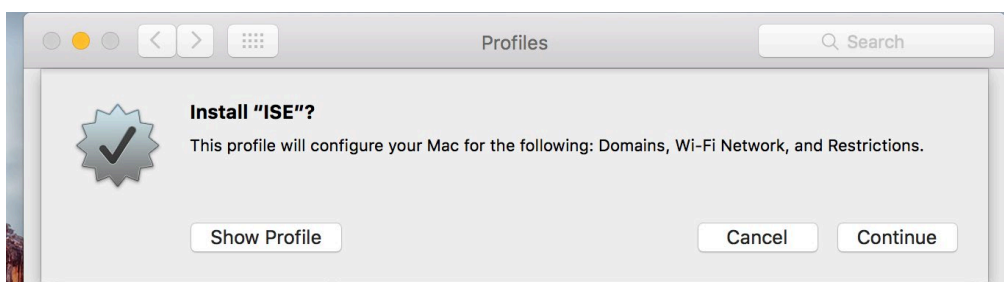

Habilitation of USI authentication on USI Network for Mac OS.

Minimum requirements

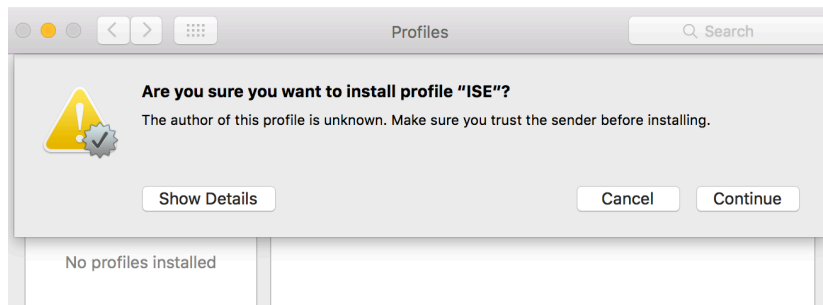

- Apple Computer

Instruction

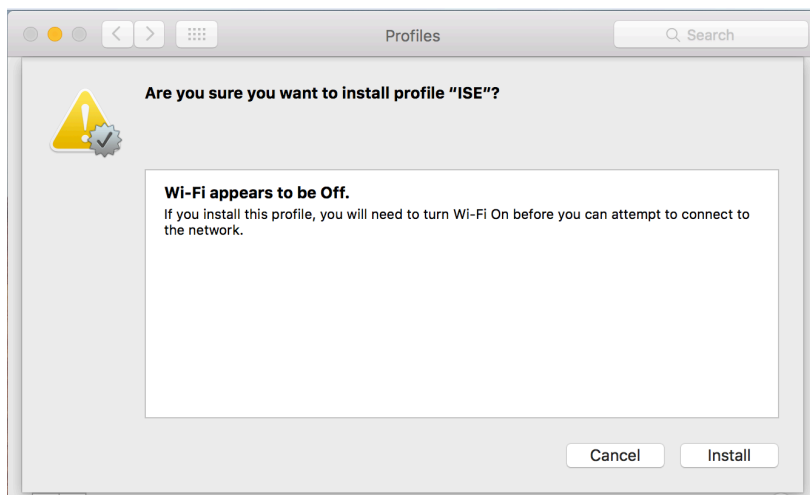

1. Download the profile for your Mac OS ([download link](#)).
Double click on the file to install it.
Press 'Continue'.

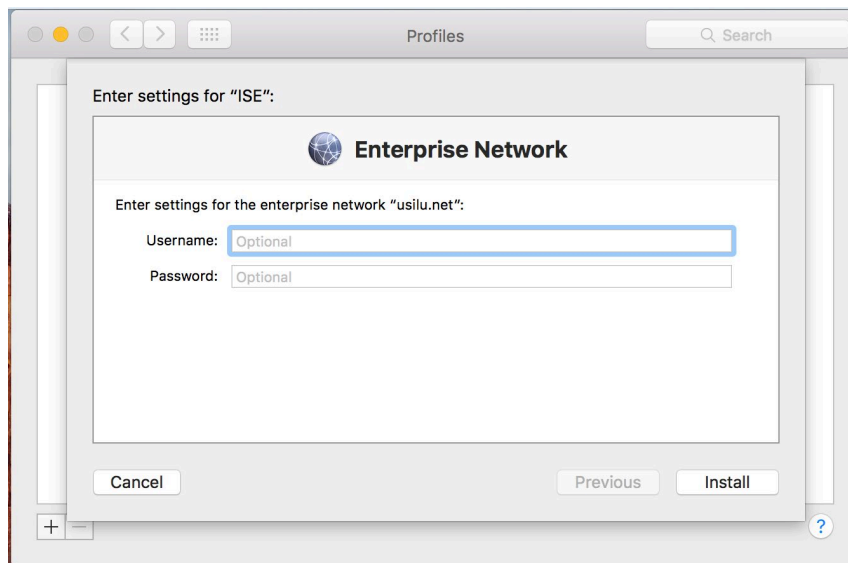

2. Press again “Continue” to confirm the installation.

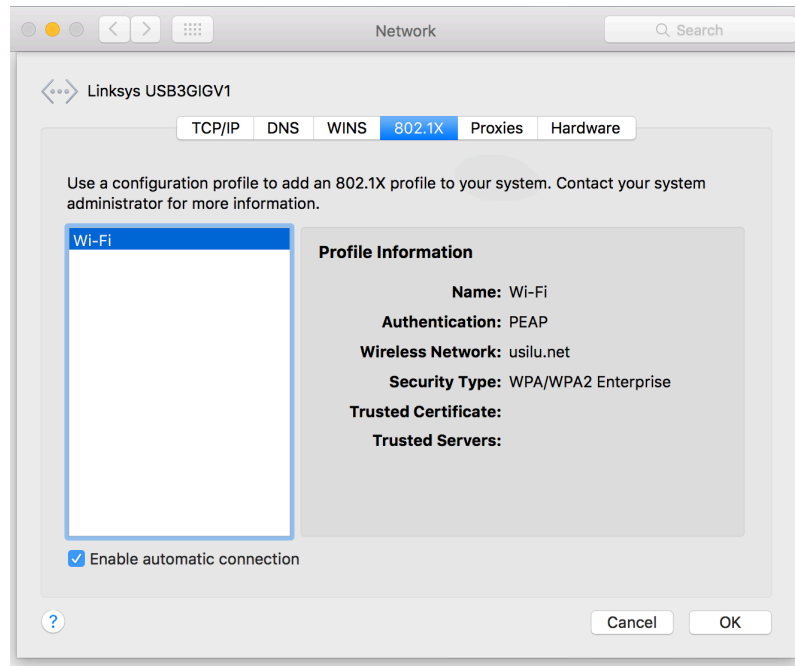

3. Press “Install” and insert the password of your Mac to proceed.

4. Now you can authenticate on the network with your USI Credentials (username@usi.ch)

5. Under your network settings (802.1x) now you can see your USI Profile.

6. Now you are connected to the right network for you and your work.
