**Connection to the USI-Guest WiFi network**

**Introduction**
This guide shows the procedure for requesting access data to the USI-Guest wireless network present on USI campuses.

**Minimum requirements**
- PC / Mac / iPhone

**Instruction**
1. Look for the one called USI-Guest in the list of available wireless connections

2. The following window will appear, where you can enter your login details if you have already received them, or register as a new guest. **Note:** If you have USI credentials, you can use those.
3. Enter your details, the only mandatory fields are the mobile number and the place where you are (Bellinzona, Lugano or Mendrisio) and click on “Register”

![Form fields for entering details]

4. You will receive an SMS or an email with the access data on your smartphone, which must be entered in the respective fields

![Form fields for entering access data]

5. The conditions of use must be accepted

![Form field for accepting conditions]

6. Click on “Continue” to connect to the network

![Form field for connecting to the network]

7. If the USI homepage is shown, access was successful
